

CANARY SPEECH &

A PARTNERSHIP THAT ENHANCES OUR TECHNOLOGICAL CAPABILITIES AND ALIGNS US WITH A LEADER IN HEALTHCARE INNOVATION.

How does Azure complement Canary Speech's technology?

Proprietary Vocal Biomarker Technology

Canary Speech's proprietary technology transforms voice samples into rich data sets for accurate and non-invasive health assessments.

"Our cutting-edge vocal biomarker technology can analyze a 40-second voice sample with the data density of an MRI, enabling early detection and monitoring of diseases."

Real-time processing and efficiency

The speed and efficiency of Azure in processing speech data and delivering results is exceptional.

"With the power of Microsoft Azure, we deliver real-time vocal scores within seconds, providing immediate insights for clinicians to improve patient care."

Scalability and reach

The scalability of Canary Speech's solution, alongside Azure's ability to process millions of transactions monthly, means that Canary can reliably serve a vast patient base.

"Leveraging Azure's robust infrastructure, we scale effortlessly to meet the needs of thousands of patients and millions of transactions each month."

Secure and compliant operations

Canary offers a HIPAA-compliant, privacy-focused SaaS for healthcare, backed by expert data security and compliance measures, and rigorous audits to ensure robust data protection.

"Our partnership with Azure ensures the highest level of security and compliance, giving our clients confidence in the safety of their data across the globe."
